- Anode coated aluminium body
- Three different illumination angles

Powerful work light for vehicle use

New compact work light suitable for many different type of use. The light can be installed several different ways.

Sarco has developed a new, efficient work light for vehicle use. Work light can be integrated into the bodywork of the vehicle, or on different mounting brackets. Sarco LED 0907 type lamps are available in three different illumination angles.

Typical usage applications are emergency vehicles, boats, snowmobiles and all-terrain vehicles. Sarco-LED work light is also suitable as an alley or reverse light. Small and light lamp is easy to install and durable in use.
